

# John R. Kasich, Governor

Mary Taylor, Lt. Governor/Director

# The Annual Health Claims External Review Report For the Year 2011

Ohio House Bill 4, passed in 1999 by the Ohio Legislature, provides Ohio consumers with the opportunity to request an independent, external review for denial, reduction, or termination by their health carrier of certain health care services. Based on the reason for denial, the law requires health carriers to provide either an external clinical peer review by an accredited Independent Review Organization (IRO) or a contractual review by the Ohio Department of Insurance (ODI).

The law also directs the Department of Insurance to compile and annually publish information regarding independent external review outcomes. This is the 11th annual report, summarizing the data the Ohio Department of Insurance has collected regarding external reviews conducted from January 1, 2011 through December 31, 2011.

# **Executive Summary of House Bill 4 Outcomes**

### Medical Peer Reviews by Independent Review Organizations (IRO)

Health plan members, or a health care provider on behalf of the plan member, may request IRO review of health care services exceeding \$500, that are denied through a health carrier's internal appeal process, where the denial is based on medical necessity or a determination that the service is experimental or investigative.

During 2011, 184 cases, involving benefit determinations of over \$3.5 million, were submitted for IRO review to determine the appropriateness of a health carrier's denial of services. Twenty-seven percent of all cases were reversed by the IRO saving Ohio health insurance consumers over \$687,000 or about 20% of the cost of all benefit denials reviewed.

About 50% of the IRO reviews completed in 2011 were for health care services related to the medical specialties of psychiatry, oncology, surgery and cardiovascular disease.

IRO reversals for surgery and hospitalization totaled over \$287,000. Reversals for drug therapies totaled almost \$192,000. Together, these health care service categories accounted for approximately 70% of the benefit amounts that were reversed in IRO decisions.

#### Contractual Reviews by the Ohio Department of Insurance (ODI)

When a health carrier's internal appeal process results in denial, reduction, or termination of a health care service on the grounds that the service is not covered under the health contract, an external contractual review may be requested from ODI.

During 2011, 101 cases were submitted to ODI for contractual review. ODI subsequently referred 13 of those cases for IRO review of a medical issue. 10 of the 101 cases submitted to ODI for contractual review resulted in reversal of previously denied benefits, including 3 of the cases that were referred for IRO review.

ODI reversals of contractual health insurer denials recovered over \$218,000 in additional benefits for Ohio consumers. Cases referred by ODI for IRO review accounted for approximately \$102,000 of those additional benefits.

#### Total Benefits to Consumers Since Enactment

Since the enactment of House Bill 4 in 1999, 4,410 cases have been reviewed by ODI and/or IROs, recovering nearly \$14 million in previously denied health care services for Ohio consumers.

Note: The name of this report has changed to more appropriately reflect its purpose as well as to avoid confusion with a recently passed federal law – The Patient Protection and Affordable Care Act.

# **Overview of House Bill 4**

The law applies to health benefit plans provided by:

- Traditional Health Insurers (ORC 3923.66-70);
- Preferred Provider Organizations (PPOs) (ORC 3923.66-70);
- Health Maintenance Organizations (HMOs/HICs) (ORC 1751.83-88); and
- Public Employee Health Benefit Plans (PEHBP) (ORC 3923.75-79).

The law requires health carriers to create an internal appeals process providing health plan members with the opportunity to challenge the denial of a health care service. In addition, health care services that are denied through a health carrier's internal appeals process, and that meet statutorily specified criteria, qualify for external review. Upon request by a health plan member, or a health care provider on behalf of a health plan member, an external review is required to be completed within thirty days, at no additional cost to the health plan member. An expedited review is required to be completed within seven days for conditions that could, in the absence of immediate medical attention, result in:

- Placing the health of the plan member or, with respect to a pregnant woman, the health of the plan member or the unborn child, in serious jeopardy;
- · Serious impairment of bodily function; or
- Serious dysfunction of any bodily organ or part.

The law provides that clinical peer review of medical denials be conducted by IROs that have been accredited by ODI. Denials based on whether a health care service is covered under a health plan contract are reviewed by ODI. Subject to the other terms, limitations, and conditions of the health plan contract, a health carrier is

required to provide coverage for any health care services that are determined by an IRO decision to be medically necessary or not experimental/investigative, or that are determined by ODI to be covered services under the contract.

The law (ORC 3901.82) directs ODI to compile information about external review outcomes and to publish and provide a report of that information annually to:

- The Governor;
- The speaker and minority leader of the Ohio House of Representatives;
- The president and minority leader of the Ohio Senate; and
- The chairs and ranking minority members of the House and Senate committees with jurisdiction over health and insurance issues.

#### **Discussion of Review Outcomes**

# External Reviews by Independent Review Organizations (IRO)

An analysis of the data over the 12-month period from January 1, 2011 to December 31, 2011, shows that IRO reviews involved benefit determinations amounting to approximately \$3.5 million. IRO decisions reversing service denials saved health plan members over \$687,000. The total benefits recovered for the top 5 cases where health carrier denials were reversed exceeded \$330,000.

Based on the amount of benefits paid, the top 5 cases reversed through the IRO external review process during this reporting period were:

HEALTH CARE SERVICE	EST. BENEFIT \$'s PAID (Reversed)
Brain Cancer Treatment	\$86,000
Spinal Surgery	\$77,000
Radiation Treatment	\$64,000
Magnetoencephalography	\$54,000
Growth Hormone Rx Therapy	\$50,000

#### Number of IRO Reviews Conducted / Outcomes

For the reporting period of January 1, 2011 to December 31, 2011, 184 reviews were assigned to IROs for review to determine the appropriateness of a health carrier's denial of services based on medical necessity or experimental/investigative treatment.

Standard reviews, permitting a 30-day maximum review period, were requested in 170 of the cases. The IROs reversed benefit coverage denials in 43 standard reviews (25%) and affirmed the health carrier's denial in the remaining 127 standard reviews (75%).

Fourteen IRO cases were expedited, requiring a 7-day maximum review period. In 6 of those cases (43%), the IROs reversed the health carrier's original denial.

# Average Time Required to Conduct IRO Reviews

Out of 184 reviews, 93% were completed within the statutory time requirements. The average time to process a standard IRO review was 24 days. All but 2 expedited reviews were completed in 7 days or less.

#### Cost of External Reviews

The cost of an external review is based on several factors, including, whether the review type is standard or expedited, the carrier's basis for denial, and the medical condition involved. For example, review to determine medical necessity only requires one reviewer, while review of experimental services for terminal illness requires a panel of three reviewers. IRO review cost is paid by the health carrier. In 2011, the total cost to Ohio health carriers for IRO reviews was approximately \$184,000. The average cost per standard review was about \$957; while the average cost per expedited review was \$1,583. Expedited review costs accounted for \$22,165 (12%) of total review costs.

#### Summary of Services and Procedures

In 2011, IRO external reviews spanned a wide variety of health service categories. The highest proportion of reviews were for surgery (22%) followed by reviews for testing (21%). Reversals of benefit denials in these two service categories accounted for approximately \$306,000 or nearly 45%, of the over \$687,000 in benefit denials reversed by IRO decisions. Together, review of hospitalization and drug therapies, comprised another 28% of the reviews conducted and a corresponding 47% of the benefit denial amounts reversed. These 4 service categories represent approximately 71% of the 184 cases reviewed and about 92% of the total benefit denial amounts that were reversed in 2011. See **Attachment 1, IRO Reviews by Services and Procedures.** 

### Medical Specialty Types

During the process to initiate an IRO review, a health carrier identifies the medical specialty category required for the review. Case review activity by category of medical specialty is listed in *Attachment 2, IRO Reviews by Medical Specialty*.

Based on the number of reviews, the five medical specialties most often required for IRO review during this reporting period were:

MEDICAL SPECIALTY	NUMBER OF REVIEWS	TOTAL BENEFIT \$'s REVIEWED	TOTAL BENEFIT \$'s PAID (Reversed)
Psychiatry / Psychology (includes Addiction)	31	\$524,026	\$7,073
Oncology	28	\$566,318	\$77,531
Neurology	23	\$888,754	\$185,944
Cardiovascular & Vascular Medicine	16	\$137,666	\$66,266
Orthopedics	10	\$405,231	\$77,000

# External Contractual Reviews by ODI

The law requires ODI to review disputes for health care services that have been denied, reduced or terminated by a health carrier on the grounds that the service is not covered under the health contract. ODI has established an internal review team comprised of specialists from the Office of Legal Services, the Office of Product Regulation, and the Consumers Services Division. If ODI finds that a coverage determination cannot be made because a medical issue must be resolved, ODI advises the health carrier that they must provide the member with an opportunity for an external review. When ODI makes a determination that a disputed health care service is covered under the health policy or contract, the carrier must either cover the service or provide the opportunity for an external review.

#### Number of Contractual Reviews Conducted / Outcomes

From January 1, 2011 to December 31, 2011, 101 contractual external reviews were submitted to ODI. As a result, Ohio consumers received \$218,126 of previously denied health benefits. Of that amount, approximately \$102,000 was paid based on cases referred by ODI for IRO review.

Health carrier denials based on benefit limits or services not covered by the contract were upheld in 91 cases (90%) and reversed in 10 cases (10%). Of the 101 total cases, ODI determined that 13 cases (13%) involved a medical question and referred those cases for IRO review. In 3 of those cases, the subsequent IRO review resulted in reversal of previously denied services.

#### Contractual Reasons for Review

Based on the number of reviews, the top three categories for contractual reviews performed by ODI during this reporting period were:

REVIEW CATEGORY	TOTAL NUMBER OF REVIEWS	TOTAL BENEFIT \$'s PAID(Reversed)
Out of Network	12	\$0
Experimental/Investigative	8	\$740
Pre-Existing Condition	6	\$0

### Average Time Required to Conduct Contractual Reviews

The time required to conduct a comprehensive contractual review is dependent on the complexity of the case and the need for legal review of a consumer's contract. The average time for ODI completion of a contractual review in 2011 was 180 days.

#### Conclusion

Since enactment of House Bill 4 in 1999, ODI has maintained a significant investment of staff resources and technology to ensure thorough and timely resolution of external review appeals. As a result, 4,410 external reviews have been conducted, recovering almost \$14 million in previously denied health care benefits for Ohio consumers.

The ODI website offers secure, easy access to both the IRO and the contractual external review processes. A secure web-accessible application is the portal used by health carriers and IROs to facilitate the IRO review process and to provide outcome reporting to ODI. This technology is also utilized by ODI to closely monitor IRO review activity. Consumers can directly initiate a contractual appeal with ODI by completing an online consumer complaint form.

ODI's ongoing efforts to publicize the opportunity and the process for external review include providing information in consumer guides and on the department website (<a href="www.insurance.ohio.gov">www.insurance.ohio.gov</a>).

ODI and the Ohio State Medical Association (OSMA) collaborated to develop and distribute an external review "toolkit" of informative materials targeted specifically to Ohio consumers and health care providers. An online version of this toolkit is available on the department's website at

http://www.insurance.ohio.gov/Consumer/Publications/IRO%20Brochure.pdf.

ODI is committed to ensuring that the protections and benefits provided under Ohio external appeal laws are increasingly made known and remain highly accessible to all eligible Ohio consumers.
